FK-K	Fittings Repair Kit	£2.95

One fundamental objective of water conservation is universal metering. In a recent study it was found that less than 30% of UK Households had a water meter. Water agencies have found that by fitting a meter alone can reduce consumption by 20-40%. It also raises awareness of water use and this is where FlushKING comes in. Water metering can also identify leaks and will benefit society in years to come. It is coming and the only thing to do is **BEAT THE METER** by installing a FlushKING product in your toilet.

Introducing **FlushKING** is the next step in reducing water consumption.
